Kyle Whittle

Customer Education & Knowledge Operations Leader

Austin, TX Metro | kbwhittle88@gmail.com | linkedin.com/in/kwhittle88 | spicybrainsolutions.com

SUMMARY

I build customer education programs that customers pay for and that take cost out of support. At Canopy I grew an onboarding and education org from 1 to 30, owned the operating budget and carried revenue goals for paid implementation and data migration services, and built the knowledge base, LMS, video library, and 2 certification programs from nothing. At Qualtrics I launched Experience Basecamp, an on-demand academy of 70+ courses that generated $1.6MM in 24 months. At Entrata I lead 15 writers and instructional designers across 60+ product lines and built the 4-agent AI pipeline that now runs the content workflow in production.

EXPERIENCE

Senior Manager, Customer Knowledge & Content Operations

April 2025 to Present

Entrata (proptech B2B SaaS)

Lead a 15-person multidisciplinary team, 6 technical writers and 9 instructional designers, covering the help center, LMS courses, and release education across 60+ product lines.

- Absorbed and rebuilt an inherited instructional design team of 9 with serious morale and retention problems, and set the first course strategy the team has had: LMS courses built for new-customer onboarding, help center for full product coverage.
- Built a 4-agent AI pipeline (Python, GitHub) that runs the technical writing workflow in production. Standard updates down 62% (8 hours to 3 across 80% of the work), complex drafting from 14 hours to 90 minutes, freeing 8+ hours a cycle for deeper content audits.
- Built a content analysis layer on Claude, ChatGPT, and Gemini that pulls patterns from support tickets, release notes, and engagement data, work that used to require a developer.
- Moved the team off article-count targets to KCS signal-driven prioritization, scoring articles by accuracy, complexity, and ticket impact so content investment lands where the tickets actually are.
- Led the Zendesk platform migration, adding AI search, a rebuilt taxonomy, and analytics instrumentation. Self-service rates rose 25% year over year.
- Synced help content, release notes, and in-app tooltips to the product release calendar with Product and Support, cutting the day-one ticket spike that used to follow each release.
- Built a Jira intake and governance workflow that cleared recurring SME bottlenecks and cut content turnaround 35%.

Director, Customer Onboarding & Education

March 2022 to April 2025

Canopy (Senior Manager, Customer Support Nov 2022 to Dec 2023; Manager, Instructional Design Mar 2022 to Nov 2022)

- Grew the onboarding and education org from 1 to 30 across 4 teams, supporting 900 to 1,000 customer implementations a year.
- Owned the operating budget and carried revenue goals for paid implementation and data migration services, including scoping and staffing against demand.
- Built the enablement system from scratch: knowledge base, LMS, video library, and 2 certification programs. Onboarding efficiency up 30%.
- Cut average onboarding from 3 to 4 months down to 30 to 60 days by redesigning the program around customer size and complexity.
- Cut churn 40% in the first year by feeding Support, Training, and Implementation signal into closed-loop action plans.
- Deployed AI self-service tools and chatbots that deflected 45%+ of tickets year over year.
- Held 90%+ CSAT through a 200% support volume surge and cleared resolution queues 3x faster by isolating root-cause bottlenecks and driving cross-functional fixes.

- Built Canopy's Zendesk knowledge base, cutting support queries 37%, and rebuilt on-demand training (60+ videos, 2 e-learning courses) around customer behavior data and common failure points.

Customer Support Operations Manager

May 2019 to April 2022

McMaster-Carr Cleveland, OH

- Ran order operations for a team of 25 handling 10,000+ orders a day at a 97% SLA, using demand forecasting to hold service levels through peak periods.

Product Manager, Education | Instructional Designer

March 2014 to May 2019

Qualtrics XM Provo, UT

- Launched Experience Basecamp, Qualtrics' on-demand learning platform, digitizing 70+ courses. The program generated $1.6MM in revenue over 24 months.
- Built a post-sales education program for $1M+ accounts that reached 250K employees across international markets.
- Piloted an analytics curriculum across 20+ high-priority accounts that hit 130% of expansion targets.
- Cut content production time 20% by coaching a team of 9 through a redesigned content workflow.

EDUCATION

MBA, Quantic School of Business and Technology, 2022

MEd, Instructional Design (minor: Psychometrics), University of Utah, 2019

BS, Industrial/Organizational Psychology (minor: Statistics), Brigham Young University-Idaho, 2014

CERTIFICATIONS

AI Fluency Framework & Foundations, Anthropic, 2026

Claude 101, Anthropic, 2026

Qualtrics Research and CX Core

SKILLS

Customer education: LMS and customer academy ownership, certification programs, instructor-led and self-paced curriculum, learning paths, adult learning design

Knowledge and content operations: KCS, taxonomy and content governance, QA standards, intake and workflow design, JTBD article structure, Zendesk

Program and business: Operating budget ownership, capacity planning, program measurement, cross-functional partnership with Product, Support, Sales, and Professional Services

AI and analytics: LLM content pipelines (Python, GitHub, Cursor), content signal scoring, AI search and ticket deflection, program dashboards
